Dear Forestry and Energy and environmental engineering programmes’ partners,

As you know, the application for exchange to Karelia UAS is currently open. We have already received some applications but there is room for more! The application period for spring 2020 is open until **15 October 2019**.

Attached please find the list of courses taught in English **in spring 2020**.

The **Sustainable Bioeconomy and Business Semester** is in the spring semester, please see the attached documents. Our application period is until **15 October 2019** and information on the application procedure can be found on our website. In addition to the courses listed in the attachments, the students can take courses from our **other programmes** and joint and multidisciplinary courses. The most appropriate courses will most likely be from the business programmes. Pure **forestry** studies in English are in the autumn semester but the SBBS is very suitable for forestry students as well. In addition, the exchange students can take up to 10ECTS from University of Finland (UEF) courses.

If your students are interested in practical training placements, please contact me well in advance, preferably 6 months before the start date. Note that most of our practical training placements are unpaid. If you have a student wishing to do their practical training at Karelia, please ask them to fill in the Karelia Exchange and attach their CV and training application to it.

I look forward to receiving applications from your students but if you require any further information, please do contact me! I can be reached through email, phone (sms, WhatsApp) and my Facebook page (pls see link below).

Best regards from sunny Joensuu,

Kaija
