Dear partners, dear colleagues,

We would like to inform you and your students about the opportunities for studying at the Marnix Academie in Utrecht. But first of all we want to thank you for our cooperation. We have worked together for years or just made a new contract. But most important: we communicate well, we have a close cooperation and we have a good quality of courses and experiences we can offer each other and each other’s students. We’re proud to be partners and hope to continue our partnership for very long!

You probably started the recruitment for outgoing international students from your university. We would like to bring the Marnix Academie to your attention. The Marnix Academie is particularly known for the personal connection between students and teachers and the internship in which the students bring theory into practice. A lot of our information is on our website, but we also have a folder (see attachment) that is more specific about the courses your students can follow. Could you publish our site and folder on your website, please? We also wrote a message for your students in case you’d like to mail all the information to them or publish a more personal note, from us to them, on your website. You can find that message below.

Please spread the word, we hope to reach all of your students and welcome a lot of them at our university in Utrecht!

Best wishes from Utrecht,
Team internationalisation from the Marnix Academie: Jan Karel, Leonie, Jacqueline and Daphne.
You can publish the folder that is in the attachment and refer to our website: [https://www.marnixacademie.nl/English](https://www.marnixacademie.nl/English).

We wrote a message you can use to publish on your website or mail to students:

Dear students,

We would like to inform you about the opportunities to study at one of our partner institutions in the Netherlands. They wrote a message for you, so you can learn about them and know what they offer. (You can translate this to your native language)

The Marnix Academie is a university of applied science, that distinguishes itself by having a personal approach with students. Teachers know you by name and miss you if you’re not in class. They want to get to know you on a more personal basis, so they can better understand your experiences and coach you during your internship and help you with your assignments. We also hear from students that the assignments are tough but with the coaching you learn a lot. That makes you turn in a high qualitative report from which you will receive feedback that helps you develop as a primary school teacher.

In the first semester you can choose Special Educational Needs or Humanities. In the second semester you can follow Humanities. You can also study with us for a whole year, in which case you will first do SEN and then do HUM.
Both programs make a connection with the internship you do at a primary school during your study at the Marnix Academie. This ensures that you can transfer what you learn as a student to your profession as a teacher in your internship and later as an independent, self-confident teacher. Because that is the core of our profession; we learn how to let children learn, and we can only learn that if we practice it.

At our website you can find more information about the Marnix Academie, Utrecht, our programs and the semesters, you can also read how to apply: [https://www.marnixacademie.nl/English](https://www.marnixacademie.nl/English).
If you have any questions, don’t hesitate to mail us at: internationaloffice@hsmarnix.nl. We hope to hear from you!

Best wishes,
Team internationalisation Marnix Academie
